

Media Brief

For Immediate Release

Byco's listing on the MSCI Small Cap Index, a positive indicator for the economy

Byco Petroleum Pakistan Limited is among three new companies which will be added to the MSCI Frontier Markets Small Cap Index by the close of November 30th, 2015. This has been announced in the MSCI Semi Annual Review on November 12th, 2015.

This is expected to increase Pakistan's overall importance on the Small Cap Index from the current 8.61%. The primary advantage of a company's shares listing on an MSCI index is the increased scope of investment in the company, bylocal as well as international investors. Companies with higher visibility (MSCI listed) remain at the forefront of international investors' scope.

It is pertinent to mention that the addition of Byco Petroleum Pakistan Limited is certainly a positive indicator for the economy of Pakistan in terms of higher foreign inflows. It will certainly bring much desired investment into the economy of the country. Foreign exchange reserve buildup and a reducing current account deficit are among many other benefits in this regard.

MSCI's research based indexes and analytics have helped the world's leading investor's build and manage better portfolios. Investors rely on MSCI's offerings for deeper insights into the drivers of performance and risk in their portfolios, broad asset class coverage and innovative research.

MSCI serves 97 of the top 100 largest asset managers, based upon P&I data as of December 2014 and MSCI client data as of June 2015.
