

## **MEDIA BRIEF**

### Byco Achieves 10 Million Safe Man Hours

**Islamabad, 28 January 2016:**Byco Petroleum Pakistan Limited has completed 10 million safe man hours without any Loss Time Injury (LTI) at its Refining Complex in MouzaKund, Lasbella, Baluchistan as announced by the company spokesman.

There has not been any LTI amongst employees and contractors since November 2004 that could have resulted in any one of them failing to report for duty in the following work period. This great achievement includes an extensive revamp and expansion in 2007 and continuous operation of the Refinery, Tanks and Loading facility.

Good Safety Management is the primary goal of all oil refineries and the LTI figure is the primary measure of success. Byco is committed to the safety and wellbeing of its employees and monitors all incidents carefully to help manage Safety. These are benchmarked as the Total Recordable Incident rate and Byco is currently below a remarkable 0.5 mark.

Safety of every employee is the No 1 priority of all the managers and supervisors at Byco Petroleum Pakistan Limited. Through their constant attention to safety and their ability to run the complex facility that operates 24 hours a day, 7 days a week, the Managers and Supervisors and the workers have made this remarkable feat possible by the grace of Almighty Allah.

### **About Byco**
