

Byco BYKER 4T Motorcycle Engine Oil

Engine Enriched Formula

High quality, Engine Enriched Formula, multi grade motorcycle engine oil specially designed for use in four-stroke motorcycle. It is formulated with outstanding protection for 4 stroke motorcycle engines especially those with air cooled which tend to generate more heat.

APPLICATIONS

- Air cooled, four-stroke motorcycle engine
- Water cooled, four-stroke motorcycle engines
- Particularly suitable for Japanese motorcycle engines

PERFORMANCE STANDARDS

- API SF
- API CD

KEY PROPERTIES

SAE Grade	20W-50
Base No.	9.0
Sulfated Ash, m%	0.85
Viscosity, mm ² /s @ 40 °C	165
mm ² /s @ 100 °C	19.1
Viscosity Index	130
Calcium, m%	0.30
App. Viscosity @- 15°C	9000

Guard Advantages protects against deposit and sludge

BENEFITS

* High Power & Performance

The detergent/dispersant additive system is specifically designed for motorcycle applications and provides very good control of ring belt and piston skirt deposits under high speed, high performance conditions.

* Prolongs Engine Life

Anti-wear additive system resists wear under varying high speed and load conditions by forming a protective layer on contacting surface.

* Save on Maintenance

High oxidation stability resists oil degradation at high temperatures and protects against oil thickening, and oil line and filter plugging.

* Good All-temperature Performance

The inherent multi-viscosity characteristics of the formulation maintain oil viscosity for protection at both start-up and during high temperature operation.

ENVIRONMENTAL HEALTH & SAFETY

Environmental, Health & Safety Information of this product is available in Byco Material Safety Data Sheet (MSDS). Customers are encouraged to review this information, follow precautions and comply with laws and regulations consuming product use and disposal. To obtain MSDS for this product, please contact Lubricant Technology Department.
