Directors' Report

In the name of Allah the Most Merciful and the Most Benevolent.

The Board of Directors of the Company presents the first quarterly report together with un-audited Financial Statements for the first fiscal quarter ended September 30, 2008.

Pakistan economy is presently at war on multilateral fronts - political, economic, social and external. Economically, the country is struggling with widening current account and fiscal deficit, soaring inflation, weakening rupee and falling exchange reserves. Recent changes in the geo-political scene have also drastically impacted the oil business the world over. Fluctuating Crude Oil Prices and now a sharp decline in the same has increased global economic uncertainty, bringing into question the future world demand for this energy source.

Internationally Crude Oil and Product prices remained under pressure and now have led to a downward trend. This downward trend has caused unprecedented inventory losses, affecting profitability of refineries all over the world in general, and specifically the smaller Pakistani refineries. Additionally, on local front, our Government has revised the Refinery sector's pricing formula for Diesel and Motor Spirit which has further deteriorated this sector's profitability.

The Pakistani Rupee has experienced a decline of over 30% or about Rs. 20 per dollar in value in less than four months, consequently increasing the Nation's external liabilities. This devaluation has had an immense negative affect on our Crude Oil procurement arrangements by increasing the payment in equivalent Pak Rupees. As a consequence, the Company has incurred an extra ordinary expense on account of foreign exchange differential of Rs. 1,704.978 million during the period under review which could have otherwise minimized our losses by the same amount.

As an outcome of this, the gross refining margins in the first quarter of this fiscal year have shown a very large negative trend

In the absence of an appropriate mechanism provided by the Government for a Refinery to safeguard itself from foreign exchange differential, the Refinery becomes exposed to the risk of foreign exchange parity as State Bank of Pakistan / GOP does not allow foreign exchange forward cover or hedging on oil imports, which has no bearing with its core refining business.

Hence we have requested GOP for a mechanism same as the Price Differential Claim (PDC) on account of Pak Rupee parity differential with the US Dollar between the Bill of Lading and the Letter of Credit maturity dates.

Our medium term plans, i.e. 2008-2009, call for investment in additional storage capacity of 126,000 Metric Tons, along with investment in a Single Point Mooring (SPM) in order to improve freight economics by bringing in larger Crude Oil vessels, eliminating road bowser movements of Crude Oil and the related transit losses, are in advanced stage and these projects are expected to be completed during the current fiscal year. Both these projects are aimed at developing infrastructure to enable us to become self-reliant in supply chain in the most cost-effective manner.

Our longer term plans, i.e. 2009-2010, call for investment in an Isomerization plant for converting and upgrading Light Naphtha into environmental friendly Motor Gasoline. This complete unit, comprising equipment, machinery and plant has arrived at the Port and is on its way to the Refinery Site at the time of this Report.

As a consequence of exceptional financial burden from unprecedented exchange loss especially during the quarter under review and the resultant increase in the cost of executing the projects in hand and the sponsoring shareholder have been approached to provide financial support equivalent to US Dollar 30 million which will enable the Company to bridge the required funding gap for completing these projects and meeting Company's financial obligations. We trust that even in these trying times, our sponsoring shareholder will provide this necessary financial assistance to the Company.

Your Company is also making progress in establishing its product retail outlets with the professional support of its Oil Marketing Unit and we expect to increase the number of these retail outlets to approximately 75 by June, 2009.

During the period under review, the net loss after taxation was Rs. 2,505.652 million on net sales of Rs. 19,763.503 million as compared to a profit after taxation amounting to Rs. 75.954 million from the net sales of Rs. 5,748.428 million. However, it is expected that the gross margins for hydro-skimming refineries shall improve in future.

In conclusion the Board prays to Almighty Allah for His blessings and extends its gratitude to our Shareholders for their continued support, confidence and trust in your Company and its employees' efforts.

For and on behalf of the Board of Directors

Chairman

Karachi: October 30, 2008
